## Time to catch up

### Energy delivering decent growth, as shipping remains fastest-growing segment

CDIA posted net revenue of USD 41mn in 1Q26 (+19% YoY). Energy remained the core contributor, at USD 23mn (~55% of total), growth-wise, energy segment turned in decent performance, at 7.7% YoY. Meanwhile, the logistic segment stars as the fastest-growing business for CDIA, delivering 44.7% YoY to USD 14mn, or 34% of total revenue in 1Q26, mainly driven by one additional vessel up and running in December 2025. CDIA is set to launch yet one more chemical vessel in this month (June 2026), which will bring them to a total of 9 vessels in the CDIA portfolio. IPO guidance suggests the Company will add 6 more vessels over the next 1-2 years, making shipping one of the strongest segments in CDIA organic growth.

### Overall margin starts to normalize, from one-off 2025 gain impact

1Q26 GPM came in at 24.4%, down 2.1% from the 26.6% figure recorded in 1Q25. Gross margin compression was primarily driven by higher cost of revenue, at USD 31mn (+22.5% YoY), dominated by a 132% increase in shipping cogs, equivalent to 32% of total COGS.

EBIT margin stood at 11.6% (vs. 15.3% in 1Q25), as operating expenses surged by 34.9% YoY to USD 5mn, driven by higher salaries and professional fees.

Pretax margin normalized, from 93.3% in 1Q25 to 28.9% in 1Q26, as 1Q25 saw a USD 15.9mn gain.

After accounting for income tax expense of USD 2.4mn, at an effective rate of ~13.4%, net profit in 1Q26 was reported at USD 8.4mn (-72.2% YoY), with NPM normalizing to 20.4% from 87.3% in 1Q25. The firm's financials are confirmed as healthy, with CDIA remaining in a net cash position.

### Considerable growth potential

CDIA business remains fundamentally robust, as its growth trajectory continues strong, both organically and inorganically. Energy demand is expected to be peaking over the next 3 years, and a TPIA Chlor Alkali - Ethylene Dichloride (CA-EDC) plant is expected to come online in 2027F. As for the port and storage business, M&A remain in the CDIA pipeline. For logistics, the Company now plans to expand its shipping fleet to at least 15 fleet in the next 2-3 years.

Looking at the current CDIA growth pipeline, we appraise CDIA through two valuation approaches: the Discounted Cash Flow (DCF) and Dividend Discount Model (DDM) serve for our valuation. Using the DCF, the fair value stands at IDR 815 per share, close to the current price, as CDIA remains in "expansion mode" and can still deliver >20% annual growth. Meanwhile, under the DDM method, with an estimated 40% dividend payout during 2027-2028 and average 104% payout on 2028F onwards, CDIA's fair value reaches IDR 810 per share.

## Valuation

We use two valuation approaches: the Discounted Cash Flow (DCF) and Dividend Discount Model (DDM) serve for our valuation. Using the DCF, the fair value stands at IDR 815 per share, close to the current price, as CDIA remains in “expansion mode” and can still deliver >20% annual growth. Meanwhile, under the DDM method, with an estimated 40% dividend payout during 2027-2028F and average 104% payout on 2028F onwards, CDIA’s fair value reaches IDR 810 per share.

### Forecast revision

We adjust our FY26/FY27/FY28F revenue by -37.4/+0.8/0.8%, to USD 251/514/523mn, mainly on account of a project pipeline delay: initially, the Company guided significant revenue generation from its regional asset M&A in FY26F, which could be booked at the beginning of the year. Now, however, we expect this M&A might be executed during 2H26F, and we thus slash our revenue assumption in "others" by nearly 48%.

We change our FY26/FY27/FY28F EBITDA by -52.1/-15.5/-15.5%, to USD 101/201/209mn, owing to rising fuel cost. Further, we expect company margin to be slightly compressed, going forward. Meanwhile, our FY26/FY27/FY28F free cash flow generation is also revised, by +11.1/-44/-41.6% to USD -1,179/108/96mn as it turns out company working capital and cash conversion cycle is heavier than initially expected.

Net profit is slashed by 75.8/63.4/60.0%, to USD 19/40/49mn, as overall company operational performance comes in below our initial expectation; higher interest expense as debt is expected to rise, going forward, owing to heavier working capital needs and lower free cash flow generation.

### Revenue and EBITDA Projection

We project FY26F/FY27F EBITDA to reach USD 101/201mn (+86%/+229% YoY), underpinned by continued expansion across CDIA segments, both organically and inorganically. We forecast revenue to increase to USD 251/514mn in FY26F/FY27F (+70%/+105% YoY). Once the major acquisition of regional assets is completed, as per IPO plan guidance, the Company will able to print massive revenue of around USD 160mn, which will exert a substantial effect on company revenue and profits.

## Company Overview

### CDI Group at a Glance

PT Chandra Daya Investasi Tbk. (CDI Group) was established in 2023, through a series of strategic mergers, acquisitions and asset transfers, positioning itself as the infrastructure arm of Chandra Asri Group. By the end of 2023, Electric Generating Public Company Limited (EGCO Group) acquired a 30% stake in CDI, providing additional capital to finance key projects in energy, water, and port & storage infrastructure. CDI operates across four primary investment pillars:

1. Energy
2. Water
3. Port & storage
4. Logistics

CDI operations are strategically based in Cilegon, Indonesia, a key industrial hub known for its robust chemical and steel manufacturing sectors. The region hosts the highest concentration of existing and upcoming global industrial projects in Indonesia, spanning 2,666 hectares, with more than 1,800 clients pursuing diverse industrial operations. The area benefits from a well-developed infrastructure network, encompassing energy, water, port & storage, and logistic facilities.

### Energy Pillar

CDI energy investments are managed under KCE Group, which operates across four core segments: power generation, renewable energy, electrical system services, and fuel stations.

#### Power Generation, Transmission, and Distribution:

- KCE holds an Integrated Electricity Provider (IUPTLU) permit (PB-UMKU No. 91202042224270014) valid until December 31, 2031.
- It serves as the sole electricity distributor within a 2,666-hectare industrial zone, under a Ministry of Energy and Mineral Resources license (PB-UMKU No. 91202042224270014 0004, issued May 30, 2024)
- The Company operates a 120MW Combined Cycle Power Plant (CCPP), consisting of two Gas Turbine Generators (GTG), two Heat Recovery Steam Generators (HRSG), and one Steam Turbine Generator (STG)
- Generated electricity is distributed via a 150kV transmission line and allocated according to specific voltage classifications. Using switchgear (30kV, 20kV, 6kV, 0.4kV), after the voltage is adjusted, the electricity will be distributed to end-customers using each dedicated Trafo, based on the voltage classification.

**Renewable energy provider:**

- KCE is expanding its renewable energy portfolio, focusing on solar photovoltaic (PV) solutions within its Electricity Supply Business Area (WILUS) and Non-WILUS:
- WILUS projects: 2.2MWp operational rooftop solar PV, 0.5MWp under construction, and a 14.8MWp pipeline.
- Non-WILUS projects: A 3.2MWp solar panel installation is under development.

**Electrical system service provider**

KCE provides end-to-end electrical solutions through:

- Operation and Maintenance (O&M): focus on power generation solution (PGS), Transmission & Distribution solution (TDS), Automation Electrical & Instrumentation Solution (AEIS)
- Engineering, Procurement, Service (EPC): focus on engineering & Construction Solution (E&CS), Photovoltaic & Energy Management System (PVEMS)
- Repair and Overhaul: focus on Transformer Integrated Solution (TIS), Electric Motor Solution (EMS)

**Water Pillar**

PT Krakatau Tirta Industri (KTI) was founded in 1996, as a JV between PT Krakatau Steel (Persero) and PT Krakatau Industrial Estate Cilegon. The Company has become a leading provider of potable water solutions for industrial and community use in Cilegon City and its surrounding areas. A significant ownership change occurred on 27 Feb-23, with PT Krakatau Steel (Persero) Tbk retaining a minor 0.01% stake, PT Krakatau Sarana Infrastruktur holding 50.99%, and CDI Group acquiring 49%.

The KTI client base is predominantly industrial, accounting for 85.59% of its customer segmentation, highlighting the Company's strong foothold in the industrial sector, where a reliable water supply is critical. Households contribute 13.71% to the customer mix, while the remainder is comprised of social, government and other sectors. The chemical and gas industries are the largest consumers, representing 43.22% of industrial usage, followed by the steel industry at 26.96%. This diverse client base underscores KTI's capability to cater to a wide range of water needs across different sectors.

KTI is renowned for its operational efficiency, achieving one of the industry's lowest water loss rates, at 2.19% in 2023, down from 2.29% in 2021. This underscores the Company's commitment to minimizing resource wastage and optimizing water management processes. Beyond conventional water treatment, the Company has implemented specialized water management solutions, including wastewater treatment (removing contaminants from industrial and municipal wastewater to make it safe for discharge or reuse), demineralization (demin), and desalination / reuse (treating and repurposing wastewater for non-potable or potable applications, reducing overall water consumption).

### Potable Water Sources:

- **Nadra Krenceng Reservoir:** Established in 1977 by PT Krakatau Steel (Persero) Tbk., the Nadra Krenceng Reservoir serves as a critical artificial lake designed to mitigate raw water shortages from the Cidanau River. Strategically located in Masigit Village, Ciwandan District, Cilegon City, Banten Province, this reservoir primarily receives its water supply from the Cidanau River, situated approximately 27 km away, via an extensive pipeline network. The reservoir's engineering specifications include a Normal Water Level of +20.10 m (3,472,000 m<sup>3</sup>), a Minimum Water Level of +18.5 m (1,735,000 m<sup>3</sup>), and a High-Water Level of +21.70 m (5,359,000 m<sup>3</sup>) above ground level.
- **Cidanau River:** As a vital component of the Cidanau River Basin Area (DAS), spanning 22,620 hectares, the Cidanau River plays an instrumental role in the development and sustainability of Banten Province. This river basin is not only rich in water resources but also hosts the Rawa Dano, a 2,500-hectare nature reserve and endemic conservation site. The Cidanau River boasts an average surface water discharge of 2,000 liters per second, underscoring its significance in regional water management.
- **Cipasauran River:** Located approximately 48 km from Cilegon, en route to Labuan, the Cipasauran River Basin covers an area of 41.52 km<sup>2</sup>. According to Water Use and/or Utilization Permit (SIPPA) No.570/4/SIPPA-DPMPTSP/II/2018, the river can sustainably process a water discharge of 800 liters per second.

### Potable water from 2 treatment facilities:

- **Krenceng Water Treatment Plant (IPA):** Established in 1979, the Krenceng Water Treatment Plant is a key facility operated by PT Krakatau Steel (Persero) Tbk, a subsidiary known since 1996 as "PT Krakatau Tirta Industri". With an installed capacity of 2,000 liters per second, the plant sources water from the Cidanau River. The Cidanau dam, located 600 meters downstream, spans 30 meters across the river, elevating water levels for diversion to a sand trap. Water is diverted at a maximum flow rate of 3,500 liters per second to Pump Station 1 Cidanau, which houses four pumps with capacities ranging from 1,000 to 3,500 cubic meters per hour. This water is then transmitted via a 1,400 mm pipeline over a distance of approximately 27.2 kilometers to the Krenceng IPA.
- **Cidanau IPA:** Operational since 2018, the Cidanau IPA utilizes raw water from the Cipasauran Dam. The facility includes three intake pumps, each with a capacity of 400 liters per second. Located 45 kilometers from Cilegon towards Labuan, the Cipasauran Dam, completed in 2017, measures 30 meters in width and 6.5 meters in height. It elevates the Cipasauran River water for channeling to the Cidanau IPA, managed by PT KTI.

### Demin Water Service:

The other service that KTI provides is demineralization (demin) of water. Demineralization is the removal of dissolved mineral salts from water, using ion exchange technology. The resulting product, known as demineralized or deionized water, is either completely or nearly free of dissolved minerals. This can be achieved through various methods, including:

- Distillation
- Deionization
- Membrane Filtration (reverse osmosis or nanofiltration)
- Electrodialysis
- Other advanced technologies

Demineralized water is commonly referred to as deionized water, as it has had such mineral ions as sodium, calcium, iron, copper (cations), along with chloride, sulfate, nitrate (anions) removed.

KTI currently own 3 water treatment plants:

- **WTP Demin PT MCCI:** This Water Treatment Plant (WTP) was established to supply demineralized water to PT Mitsubishi Chemical Indonesia (PT MCCI), with a requirement of 220 cubic meters per hour. The plant processes raw water sourced from PT KTI's potable water facilities. Built under a "Build, Operate, Own" (BOO) business model, the WTP has a design capacity of 3 x 110 cubic meters per hour (two operational units and one standby) and has been operating continuously, 24/7, since October 2014. The demineralized water is distributed to the PT MCCI plant via a dedicated pipeline network.
- **WRP Demin PT Latinusa Tbk.:** The Water Recycle Plant (WRP) processes liquid waste from the Wastewater Treatment Plant (IPAL) of PT Pelat Timah Nusantara (PT Latinusa Tbk.) This wastewater originates from electroplating and tinplate sheet coating processes. After initial treatment in PT Latinusa Tbk.'s IPAL, it becomes raw water for demineralized water refinement. Built under a BOO scheme, the WRP has been operational 24/7 since December 15, 2011, with a design capacity of 30 cubic meters per hour.
- **O&M of WTP Demin Blast Furnace Complex of PT Krakatau Steel (Persero) Tbk.:** Since 2017, PT KTI has managed the Operation & Maintenance (O&M) of the Water Treatment Plant at the Demineralized Water Station of PT Krakatau Steel's Blast Furnace Complex. Utilizing ion exchanger technology, this WTP has a design capacity of 150 cubic meters per hour. PT KTI oversees all aspects of water treatment, from chemical supply to workforce management.

### Wastewater Treatment:

Another service that KTI provide is wastewater treatment. Wastewater treatment in the water industry involves a series of processes designed to remove contaminants from water before it is released back into the environment or reused. The process typically begins with preliminary treatment, which involves screening to remove large debris and grit. This is followed by primary treatment, where sedimentation tanks allow solids to settle out. Secondary treatment involves biological processes, such as activated sludge or biofilm systems, where microorganisms break down organic matter. Tertiary treatment further purifies the water through advanced filtration, chemical treatments, or disinfection methods like chlorination or ultraviolet light. The goal is to reduce pollutants to safe levels, ensuring the treated water is environmentally safe and suitable for its intended use, such as irrigation, industrial processes, or even potable water supply after further purification steps. KTI owned 3 wastewater treatment facilities:

- **O&M WWTP Biotreatment Blast Furnace Complex PT KS:** This Wastewater Treatment Plant (WWTP) has a capacity of 32 cubic meters per hour and utilizes biological processing technology. PT KTI manages all aspects of water treatment at this facility, including chemical supply and workforce management.
- **PT Krakatau Blue Water (PT KBW):** Established as a joint venture between PT KTI and Blue O&M Co. Ltd., PT KBW has operated since 2013. It manages a Final Wastewater Treatment facility, with a capacity of 17,000 cubic meters per day and a Reusing System with a capacity of 7,000 cubic meters per day for PT Krakatau Posco. The plant employs both conventional and membrane technology.
- **WRP Krakatau Steel Building Jakarta:** This Water Recycle Plant (WRP) processes building waste (from toilets) to produce clean water, at a rate of 2 cubic meters per hour. The treated water is reused for the chiller system. Built under a Build, Operate, Own (BOO) scheme, the WRP utilizes Membrane Bio Reactor (MBR) and Ion Exchange (decoloration) technology.

### Port & Storage Pillar

In May 2023, CDI assumed control of PT Redeco Petrolin Utama's (RPU) port & storage assets, previously held under CAP. These assets include:

- 2 berths, with an overall length (LOA) of 200 meters each, with a draft of 10 meters, suitable for berthing vessels (berth capacity) up to 35,000 DWT.
- 72 storage tanks, with a total capacity of 130,000 m<sup>3</sup>.
- Centralized Filling Station (CFS) and Customer Order Service (COS) facilities.

### Logistics Pillar

In 2024 CDI expanded into maritime logistics, through PT Chandra Shipping International (CSI) and the acquisition of PT Marina Indah Maritim (MIM). Together, these subsidiaries operate seven vessels (5,000–8,600 DWT), specializing in chemical and gas transportation. CDI manages to integrate its shipping and vessel operation capabilities of CSI and MIM, giving CDI a comprehensive and vertically-integrated logistics supply chain, encompassing storage, loading and truck transfer.

CDI either secures contracts through direct appointments or competitive tenders, offering various contract structures: spot agreements, contracts of affreightment (COA) and time charters (TC), with TC agreements typically spanning one year. However, TC agreements with Chandra Asri Group typically extend to the end of a vessel's operating lifetime. Its client base is primarily composed of companies in the chemical and gas industries. Currently, 60% of CDI shipping capacity serves internal cargo, with 40% allocated to external clients. However, in the future the Company aims to shift this balance, targeting a 60% external and 40% internal cargo mix, to optimize fleet utilization and revenue diversification.

The fleet is strategically segmented: four vessels—Estella, Aria, Marella, and Lily—are dedicated to liquefied gas transport, while three—Adria, Emeryn, and Erawan 12—handle oil and chemical shipments. Looking ahead, CDI is preparing for an aggressive fleet expansion, with eight additional vessels in the pipeline, all designed to align with its existing specifications.

#### Exhibit 35. Current fleets

##### Liquefied Gas Carrier

###### Estella Gas Vessel:

- Built in 2006
- Length 99.9m; width 17.2m; Weight 4,253 DWT
- 1 main engine 3,900KW 210 RPM
- Built with 2 chambers

###### Aria Gas Vessel:

- Built in 2006
- Length 106m; width 17.6m; Weight 5,349.2DWT
- 1 main engine 3,400KW 215 RPM
- Built with 2 chambers

###### Marella Gas Vessel:

- Built in 2011
- Length 106m; width 17.6m; Weight 4,998 DWT
- 1 main engine 3,400KW 215 RPM
- Built with 2 chambers

###### Lily Gas Vessel:

- Built in 2006
- Length 114.8m; width 16.8m; Weight 4,996 DWT
- 1 main engine 4,500KW 600 RPM
- Built with 3 chambers

##### Oil / Chemical Tanker

###### Adria Vessel:

- Built in 2022
- Length 111.9m; width 19m; Weight 8,557 DWT
- 1 main engine 3,900KW 210RPM
- Built in with 16 chambers

###### Emeryn Vessel:

- Built in 2004
- Length 113.9 m; width 18.2m; Weight 8,626 DWT
- 1 main engine 3,900KW 210 RPM
- Built with 17 chambers

###### Erawan 12 Vessel:

- Built in 2003
- Length 104.9m; width 17m; Weight 6,464.5DWT
- 1 main engine 3,090KW 210 RPM
- Built with 10 chambers

## Key Risks

### Global Uncertainties

- Regional and global economic shifts, including inflation, geopolitical tensions and supply chain transformations pose significant uncertainties for the Indonesian economy and the Company's business activities.
- Historical crises have highlighted vulnerabilities in Indonesia's financial system, and current global dynamics could exacerbate these challenges.

### Foreign Exchange Risk

Fluctuations in the Rupiah against major currencies (like the US dollar) could materially impact the Company's financial condition. While Bank Indonesia's interventions aim to stabilize the currency, the global economic environment remains unpredictable.

### Customer Dependency Risk

The Company relies heavily on such strategic clients as Krakatau steel and Chandra Asri Group for its electricity, logistics, port services, and water supply. Any disruption or termination of these relationships could significantly affect operational performance and financial health.

### Energy Sector Risks

- Regulatory Challenges: The Indonesian government's regulatory framework for electricity is comprehensive, covering private sector participation, tariff structures, and technical standards. Changes in regulations could pose adaptation challenges and potentially interrupt operations.
- Operational Disruptions: Risks include equipment failure and natural disasters, which could lead to unplanned maintenance and operational downtime, impacting revenue from electricity sales.
- Vendor Dependency: Limited technology transfer and exclusive specifications create dependency on specific vendors for parts, affecting bargaining power and potentially increasing costs.
- Gas Supply Risk: Disruptions in natural gas supply from PGN could reduce electricity production capacity, leading to potential penalties for unmet contractual obligations.

### Logistics Sector Risks

- Contractual Fulfillment: Weather conditions and rising customer standards could delay shipments, resulting in penalties and financial impacts.
- Maritime Accidents: Natural disasters, mechanical failures, and human error pose risks of maritime accidents, affecting reputation and increasing operational costs.
- Fleet Damage: Damage to shipping vessels could lead to financial losses from repair costs and lost revenue, exacerbated by the need to lease replacement vessels.

### Port & storage Sector Risks

- Sedimentation and Water Levels: Natural sedimentation and fluctuating water levels resulting from climate change could impede port operations, affecting ship maneuverability and efficiency.
- Capacity Constraints: Overutilization of port infrastructure could lead to congestion and operational inefficiencies.
- Operational Efficiency: Maintaining optimal efficiency in port operations requires continuous upgrading in management and workforce competence.

### Water Supply Sector Risks

- Climate Impact on Water Supply: Climate change could affect raw water availability, impacting the Company's ability to meet customer commitments.
- Infrastructure Failures: Failures in water supply infrastructure could disrupt services and lead to contractual penalties.

## Company Profile

PT Chandra Daya Investasi (CDI Group) has operated as the infrastructure investment arm of Chandra Asri Group, a leading force in Indonesia's energy, chemical and infrastructure industries, starting on 9 Feb-23. Additionally, CDI is partnered with EGCO, a prominent power company from Thailand. Based in Cilegon, Indonesia, CDI is dedicated to driving forward infrastructure investments that span energy, water, storage and logistics sectors.

The Company has 4 business pillars:

1. **Energy Pillar:** This business is dedicated to the generation and distribution of electricity, alongside the advancement of renewable energy projects. It aims to meet growing energy demands, while supporting sustainable development.
2. **Water Treatment Pillar:** Treatment of clean and specialized water. It leverages extensive experience to provide innovative water management solutions to meet diverse needs.
3. **Port & Storage Pillar:** Focusing on offering jetty and tank farm services, this pillar caters to the handling and storage of chemicals and refined petroleum products, ensuring efficient and safe operations.
4. **Logistics Pillar:** This pillar manages vessel operations, with Chandra Asri Group as its primary client. Meanwhile 40% of CDI shipping capacity is currently allocated to external clients.

## DISCLAIMER

By receiving this research report ("Report"), you confirm that: (i) you have previously requested PT BCA Sekuritas to deliver this Report to you and you are legally entitled to receive the Report in accordance with Indonesian prevailing laws and regulations, and (ii) you have fully read, understood and agreed to be bound by and comply with the terms of this Report as set out below. Your failure to comply with the terms below may constitute a violation of law.

This Report is strictly confidential and is for private circulation only to clients of PT BCA Sekuritas. This Report is being supplied to you strictly on the basis that it will remain confidential and that you will maintain its confidentiality at all times. Without the prior written consent of PT BCA Sekuritas authorized representative(s), no part of this Report may be (i) copied or reproduced in any form by any means, (ii) redistributed or delivered, directly or indirectly, to any person other than you, or (iii) used for any other purpose that is not in line with the terms of the Report.

PT BCA Sekuritas, its affiliates and related companies, their directors, associates, connected parties and/or employees (excluding the individual analysts who prepare this Report) may own or have positions in securities of the Company(ies) covered in this Report and may from time to time buy or dispose, or may have material interest in, those securities.

Further, PT BCA Sekuritas, its affiliates and its related companies do and seek to do business with the Company(ies) covered in this Report and may from time to time: (i) act as market maker or have assumed an underwriting commitment in the securities of such company(ies), (ii) sell to or buy those securities from other investors for its own account, (iii) perform or seek to perform significant investment banking, advisory or underwriting services for or relating to such company(ies), or (iv) solicit any investment, advisory or other services from any entity covered in this Report. Furthermore, the personnel involved in the preparation of this Report may also participate in the solicitation of the businesses as described above.

The views expressed in this Report reflect the personal views of the individual analyst(s) at PT BCA Sekuritas about the securities or companies mentioned in the Report and the compensation of the individual analyst(s), is, or will be directly or indirectly related to the performance of PT BCA Sekuritas' activities. PT BCA Sekuritas prohibits the individual analyst(s) who prepared this Report from receiving any compensation, incentive or bonus based on specific investment banking transactions or for providing a specific recommendation for, or view of, a particular company (including those covered in the Report). However, the individual analyst(s) may receive compensation based on the scope of his/her coverage of company(ies) in the performance of his/her duties or the performance of his/her recommendations.

In reviewing this Report, you should be aware that any or all of the above activities of PT BCA Sekuritas, its affiliates and related companies, their directors, associates, connected parties and/or employees, among other things, may give rise to real or potential conflicts of interest between them and you.

The content of this Report is prepared based on data believed to be correct and reliable on the date of this Report. However, this Report: (i) is not intended to contain all necessary information that a prospective investor may need, (ii) is not and should not be considered as an investment advice in any way, and (iii) cannot be relied as a basis for making an informed investment decision. Accordingly, PT BCA Sekuritas does not guarantee the adequacy, accuracy, completeness, reliability or fairness of any content of this Report and PT BCA Sekuritas, its affiliates and related companies, their directors, associates, connected parties and/or employees (including the analysts) will not be liable in any way for any consequences (including but not limited to any direct, indirect or consequential losses, loss of profits and damages) arising from or relating to any reliance on or use of the content of this Report by any person (including you).

This Report is general in nature and has been prepared for information purposes only. It is intended for circulation amongst PT BCA Sekuritas' clients only and does not consider any specific investment objectives, financial situation and the particular needs of any specific person who may receive this Report. The entire content of this Report is not and cannot not be construed or considered as an offer, recommendation, invitation or solicitation to enter into any transaction (including trading and hedging) relating to the securities, other financial instruments, and other form of investments issued or offered by the Company(ies) covered in this Report.

It is your own responsibility to: (i) independently evaluate the content of this Report, (ii) consider your own individual investment objectives, financial situation and particular needs, and (iii) consult your own professional and financial advisers as to the legal, business, financial, tax and other aspects before participating in any transaction in respect of the securities of company(ies) covered in this Report.

Please note that the securities of the Company(ies) covered in this Report might not be eligible for sale in all jurisdictions or to all categories of investors. The availability of those securities and your eligibility to invest in those securities will be subject to, among others, the prevailing laws of the relevant jurisdiction covering those securities. Furthermore, the value and income of any of the securities covered in this Report can fall as well as rise and an investor (including you) may get back less than invested. Future returns are not guaranteed, and a loss of original capital may be incurred. Foreign-currency denominated securities are subject to fluctuation in exchange rates that could have a positive or adverse effect on the value, price or income of such securities and financial instruments. Past performance is not indicative of comparable future results and no guarantee regarding future performance is provided in this Report.

This Report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to the applicable laws or regulation of such jurisdiction.
